

IN THE CLAIMS:

Please AMEND claims 1 and 42 in accordance with the following:

1. (Currently Amended) A computer readable data storage medium for use with a recording and/or reproducing apparatus, comprising:

a first file comprising reproduction information for reproducing audio visual stream data, the reproduction information comprising information indicating a reproduction interval of the audio visual stream data; and

a second file comprising navigation data, the navigation data including control commands which ~~is~~are used to select the reproduction information,

wherein the first file and the second file are recorded separately on the data storage medium.

2. (Previously Presented) The medium of claim 1, wherein the audio visual stream data is video object data, still image data, or audio data.

3. (Canceled)

4. (Previously Presented) The medium of claim 1, wherein a first layer which the reproduction information belongs to is distinguishable, logically and physically, from a second layer which the navigation data belongs to.

5. (Previously Presented) The medium of claim 4, wherein the second layer is an upper layer of the first layer.

6-41. (Canceled)

42. (Currently Amended) A reproducing apparatus for reproducing data from a data storage medium, comprising:

a reader which reads a first file comprising reproduction information for reproducing audio visual stream data, the reproduction information comprising information indicating a

reproduction interval of the audio visual stream data, and a second file comprising navigation data, the navigation data including control commands which ~~is~~are used to select the reproduction information from the data storage medium; and

a controller which reproduces the audio visual stream data from the data storage medium based on the first file and the second file,

wherein the first file and the second file are recorded separately on the data storage medium.

43. (Previously Presented) The apparatus of claim 42, wherein the audio visual stream data is video object data, still image data, or audio data.

44. (Previously Presented) The apparatus of claim 42, wherein a first layer which the reproduction information belongs to is distinguishable, logically and physically, from a second layer which the navigation data belongs to.

45. (Previously Presented) The apparatus of claim 44, wherein the second layer is an upper layer of the first layer.
